Bridge Communications Operator Console Scales from SMB to Enterprise

Customers and Resellers are excited about the capabilities the Bridge Operator Console is bringing to Microsoft Skype for Business and Office 365.

FARGO, ND – April 13, 2016 – Bridge Communications today announced they are seeing tremendous growth and adoption rates of the Bridge Operator Console for Microsoft Skype for Business and Office 365.

The Bridge Operator Console brings enterprise call control features to Office 365 and Skype for Business customers. Whether a Small Business with 5 employees or an enterprise of tens of thousands of end points, the Bridge Operator console scales well. With integrations for Exchange, Group Messaging, HL7 Medical Connector, Nurse Call TAP Integration, a Boss-Admin client and High Availability Options, nearly every vertical will find value in the affordable solutions.

"By extending Skype for Business with our technology, Bridge Operator Console is able to overcome the client limitations." Said Doug Routledge, Head of Development for Bridge Communications. "Our solutions truly provide customers of any size with the industry's most powerful attendant console."

Many customers are reaping the benefits of the Bridge Operator Console. Customers are gaining additional efficiencies and finding the solution to be powerful and cost effective. Resellers are increasing their 'win rate' by providing the added functionality that comes with the solutions.

"The call control enhancements, familiar user interface and additional features of the Bridge Operator Console extend Office 365 and Skype for Business functionality. Its' ability to scale adds value for Bridge Communications customers who also use Office 365 and Skype for Business," said Rob Howard, director, Office 365 Ecosystem, Microsoft.

Skype for Business simplifies infrastructure with one platform for calling, conferencing, video, and sharing. It connects teams with the experience they love, in the Office applications they use every day.

Bridge Communications is a United States based Software Company with headquarters in Fargo, ND. Founded in 2006, Bridge Communications has installations around the globe providing a feature rich, scalable Attendant/Operator Console and related solutions for Microsoft and Cisco platforms. Bridge Communications philosophy is simple. Listen to customers and develop world class solutions that exceed their business needs.
